Scenarios

✓ cypress/features/01-authentication.feature

Feature: User Authentication

As an Amazon user
I want to manage my account credentials
So that I can securely access my account

Scenario: TC-001 - New user registration with valid data

- ✓ **Given** I am on Amazon home page 60ms
- ✓ **When** I click on Sign In button 83ms
- ✓ **And** I click on Create Account link 580ms
- ✓ **And** I enter email "newuser@gmail.com" 415ms
- ✓ **And** I enter name "John Doe" 302ms
- ✓ **And** I enter password "Test@123456" 352ms
- ✓ **And** I confirm password "Test@123456" 342ms
- ✓ **And** I click Create Account button 1.118s
- ✓ **Then** I should see account created message 9ms
- ✓ **And** I should be logged in to dashboard 7ms
- ✓ **And** I should see "Welcome John Doe" message 7ms

Scenario: TC-001 - Registration with invalid email format

- ✓ **Given** I am on Amazon home page 24ms
- ✓ **When** I click on Sign In button 79ms
- ✓ **And** I click on Create Account link 577ms
- ✓ **And** I enter email "invalidemail" 357ms
- ✓ **And** I enter name "John Doe" 302ms
- ✓ **And** I enter password "Test@123456" 345ms
- ✓ **And** I confirm password "Test@123456" 345ms
- ✓ **And** I click Create Account button 1.102s

- ✓ **Then** I should see error message "Invalid email format" 11ms

Scenario: TC-001 - Registration with weak password

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **When** I click on Sign In button 78ms
- ✓ **And** I click on Create Account link 576ms
- ✓ **And** I enter email "newuser@gmail.com" 412ms
- ✓ **And** I enter name "John Doe" 292ms
- ✓ **And** I enter password "weak" 247ms
- ✓ **And** I confirm password "weak" 249ms
- ✓ **And** I click Create Account button 1.098s
- ✓ **Then** I should see error message "Password must be at least 8 characters" 10ms

Scenario: TC-002 - Login with valid credentials

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **When** I click on Sign In button 75ms
- ✓ **And** I enter email "testuser@gmail.com" 511ms
- ✓ **And** I enter password "Test@123456" 330ms
- ✓ **And** I click Sign In button 79ms
- ✓ **Then** I should be logged in successfully 7ms
- ✓ **And** I should see dashboard 5ms
- ✓ **And** I should see account menu with my email 5ms

Scenario: TC-002 - Login with incorrect password

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **When** I click on Sign In button 76ms
- ✓ **And** I enter email "testuser@gmail.com" 500ms
- ✓ **And** I enter password "WrongPassword" 351ms
- ✓ **And** I click Sign In button 78ms
- ✓ **Then** I should see error message "Your password is incorrect" 5ms
- ✓ **And** I should remain on login page 5ms

Scenario: TC-002 - Login with non-existent email

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **When** I click on Sign In button 77ms
- ✓ **And** I enter email "nonexistent@gmail.com" 515ms
- ✓ **And** I enter password "Test@123456" 342ms
- ✓ **And** I click Sign In button 79ms
- ✓ **Then** I should see error message "We cannot find an account" 6ms

Scenario: TC-003 - Logout from account

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **Given** I am logged in as "testuser@gmail.com" 1.05s
- ✓ **When** I click on Account & Lists menu 78ms
- ✓ **And** I click on Sign Out option 78ms
- ✓ **Then** I should be logged out successfully 5ms
- ✓ **And** I should see Sign In button 5ms
- ✓ **And** I should be redirected to home page 4ms

Scenario: TC-003 - Session expires after logout

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **Given** I am logged in as "testuser@gmail.com" 1.039s
- ✓ **When** I click on Account & Lists menu 76ms
- ✓ **And** I click on Sign Out option 78ms
- ✓ **And** I try to access account page directly 28ms
- ✓ **Then** I should be redirected to login page 4ms

Scenario: TC-002 - Remember me functionality

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **When** I click on Sign In button 77ms
- ✓ **And** I enter email "testuser@gmail.com" 489ms
- ✓ **And** I enter password "Test@123456" 326ms
- ✓ **And** I check Remember Me checkbox 56ms
- ✓ **And** I click Sign In button 74ms
- ✓ **Then** I should be logged in successfully 6ms
- ✓ **And** my email should be pre-filled on next login attempt 21ms

Scenario: TC-002 - Two-factor authentication setup

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **Given** I am logged in as "testuser@gmail.com" 1.067s
- ✓ **When** I go to Account Settings 23ms
- ✓ **And** I click on Security Settings 5ms
- ✓ **And** I enable Two-Factor Authentication 5ms
- ✓ **And** I verify with phone number "+1234567890" 327ms
- ✓ **Then** I should see "2FA enabled successfully" message 9ms
- ✓ **And** I should receive OTP on login attempts 6ms

Feature: Shopping Workflows

As an Amazon customer
I want to search, browse, and purchase products
So that I can shop efficiently

Scenario: TC-004 - Search product by keyword

- ✓ **Given** I am on Amazon home page 30ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.075s
- ✓ **When** I click on search box 78ms
- ✓ **And** I enter search keyword "laptop" 205ms
- ✓ **And** I press Enter or click Search button 784ms
- ✓ **Then** I should see search results page 14ms
- ✓ **And** I should see list of laptop products 11ms
- ✓ **And** I should see price for each product 6ms
- ✓ **And** I should see star ratings 6ms
- ✓ **And** I should see product images 5ms

Scenario: TC-004 - Search with filters

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.049s
- ✓ **When** I click on search box 79ms
- ✓ **And** I enter search keyword "laptop" 203ms
- ✓ **And** I press Enter or click Search button 699ms
- ✓ **Then** I should see search results 7ms
- ✓ **When** I apply filter "Price: \$500-\$1000" 206ms
- ✓ **And** I apply filter "Brand: Dell" 207ms
- ✓ **And** I apply filter "Rating: 4+ stars" 208ms
- ✓ **Then** I should see filtered results 6ms
- ✓ **And** All products should be within selected price range 5ms
- ✓ **And** All products should be from Dell brand 4ms
- ✓ **And** All products should have 4+ rating 5ms

Scenario: TC-004 - Sort search results

- ✓ **Given** I am on Amazon home page 20ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.041s
- ✓ **When** I click on search box 77ms
- ✓ **And** I enter search keyword "headphones" 250ms
- ✓ **And** I press Enter or click Search button 795ms
- ✓ **Then** I should see sort dropdown 11ms

- ✓ **When** I select sort option "Price: Low to High" 315ms
- ✓ **Then** results should be sorted by ascending price 12ms
- ✓ **When** I select sort option "Highest Rating" 312ms
- ✓ **Then** results should be sorted by rating descending 10ms
- ✓ **When** I select sort option "Newest" 315ms
- ✓ **Then** results should show newest products first 11ms

Scenario: TC-005 - Add single product to cart

- ✓ **Given** I am on Amazon home page 20ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.045s
- ✓ **When** I search for product "Dell Laptop 15-inch" 1.102s
- ✓ **And** I click on first product result 568ms
- ✓ **Then** I should see product details page 10ms
- ✓ **When** I enter quantity "1" 110ms
- ✓ **And** I click Add to Cart button 564ms
- ✓ **Then** I should see "Added to Cart" confirmation 13ms
- ✓ **And** Cart count should increase to "1" 7ms
- ✓ **And** I should see success toast message 5ms

Scenario: TC-005 - Add multiple items to cart

- ✓ **Given** I am on Amazon home page 20ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.041s
- ✓ **When** I search for product "laptop" 962ms
- ✓ **And** I click on first product result 568ms
- ✓ **And** I enter quantity "1" 119ms
- ✓ **And** I click Add to Cart button 564ms
- ✓ **And** I search for product "mouse" 973ms
- ✓ **And** I click on first product result 568ms
- ✓ **And** I enter quantity "2" 121ms
- ✓ **And** I click Add to Cart button 566ms
- ✓ **Then** Cart should have 2 items 11ms
- ✓ **And** Cart count should display "3" 7ms

Scenario: TC-005 - Add out-of-stock product to cart

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.039s
- ✓ **When** I search for product "unavailable-item" 1.102s
- ✓ **And** I click on first product result 567ms
- ✓ **Then** I should see "Out of Stock" message 13ms
- ✓ **And** Add to Cart button should be disabled 7ms

- ✓ **And** I should see "Notify Me" button instead 6ms

Scenario: TC-006 - Remove product from cart

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.032s
- ✓ **Given** I have added "Dell Laptop" to cart 4ms
- ✓ **When** I go to Shopping Cart 561ms
- ✓ **Then** I should see "Dell Laptop" in cart 11ms
- ✓ **And** I should see cart subtotal 6ms
- ✓ **When** I click Remove button for "Dell Laptop" 361ms
- ✓ **Then** I should see confirmation message 11ms
- ✓ **And** Product should be removed from cart 7ms
- ✓ **And** Cart should be updated 5ms
- ✓ **And** Cart count should decrease 5ms

Scenario: TC-006 - Update cart quantity

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.023s
- ✓ **Given** I have added "Laptop" quantity 1 to cart 6ms
- ✓ **When** I go to Shopping Cart 560ms
- ✓ **And** I change quantity to "3" 118ms
- ✓ **And** I press Update or click refresh 310ms
- ✓ **Then** Cart should show quantity "3" 11ms
- ✓ **And** Subtotal should be recalculated 7ms
- ✓ **And** Price should reflect new quantity 5ms

Scenario: TC-006 - Clear entire cart

- ✓ **Given** I am on Amazon home page 20ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.044s
- ✓ **Given** I have multiple items in cart 6ms
- ✓ **When** I click on Cart menu 360ms
- ✓ **And** I click on Delete all or Clear Cart option 367ms
- ✓ **Then** all products should be removed 10ms
- ✓ **And** Cart should be empty 7ms
- ✓ **And** Message "Your cart is empty" should appear 6ms

Scenario: TC-007 - Complete checkout process

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.04s
- ✓ **Given** I have items in cart 6ms

- ✓ **When** I go to Shopping Cart 560ms
- ✓ **And** I click Proceed to Checkout button 565ms
- ✓ **Then** I should see checkout page 12ms
- ✓ **When** I select shipping address 60ms
- ✓ **And** I select shipping method "Standard (5-7 days)" 7ms
- ✓ **And** I select payment method "Credit Card" 6ms
- ✓ **And** I enter card details 438ms
- ✓ **And** I review order summary 10ms
- ✓ **And** I click Place Order button 561ms
- ✓ **Then** I should see order confirmation page 14ms
- ✓ **And** I should see Order Number 7ms
- ✓ **And** Order should be confirmed successfully 5ms

Scenario: TC-007 - Checkout with new address

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.037s
- ✓ **Given** I have items in cart 6ms
- ✓ **When** I go to Shopping Cart 559ms
- ✓ **And** I click Proceed to Checkout button 570ms
- ✓ **And** I click Add New Address 12ms
- ✓ **And** I enter address "123 Main Street" 365ms
- ✓ **And** I enter city "New York" 284ms
- ✓ **And** I enter state "NY" 216ms
- ✓ **And** I enter zip code "10001" 250ms
- ✓ **And** I save address 363ms
- ✓ **Then** new address should be selected 11ms
- ✓ **When** I continue checkout process 361ms
- ✓ **And** I place order 567ms
- ✓ **Then** Order should be confirmed with new address 14ms

Scenario: TC-007 - Apply coupon code at checkout

- ✓ **Given** I am on Amazon home page 22ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.044s
- ✓ **Given** I have items in cart 6ms
- ✓ **When** I go to Shopping Cart 560ms
- ✓ **And** I click Proceed to Checkout button 568ms
- ✓ **And** I enter coupon code "SAVE10" 261ms
- ✓ **And** I click Apply Coupon 367ms
- ✓ **Then** Discount should be applied 11ms
- ✓ **And** Order total should be reduced 7ms

- ✓ **And** Discount amount should show on summary 6ms

Scenario: TC-007 - Checkout with different payment methods

- ✓ **Given** I am on Amazon home page 21ms
- ✓ **And** I am logged in as "testuser@gmail.com" 1.051s
- ✓ **Given** I have items in cart 6ms
- ✓ **When** I go to Shopping Cart 560ms
